Strategic Sourcing Department

Single/Sole Source Justification

(Note: Return this original to Strategic Sourcing with the purchase requisition number).

Date:				
For use on Single/Sole Source Acquisitions of \$3,500 and greater.				
☐ Sole Source Is a good or service that is ONLY available	from one (1) source (vendor, manufacturer, etc.).			
□ Single Source Is a good or service that is available from numerous sources, but is required from one single source provider on a non-competitive basis.				
Check one or more of the following non-competitive acquisition justifications (See definitions page 2 below)				
Customer Direction	General Services Administration			
Engineering Direction	Federal Supply Schedule			
Proprietary Items	Environmental Direction			
Only Qualified Supplier	Source Controlled Drawing			
Spare Items	Consulting Services			
Time Limitations	Follow-on			
Economic Considerations	Other Cost Factors (ie. standardization)			

Non-Competitive Acquisition Justifications

<u>Customer Direction</u>: A specific paragraph must be referenced from governmental agency (grant, prime contract, follow-on) that identifies the requirement as non-competitive.

Engineering Direction: When the product is identified on Engineering drawing or specification; such as, "No substitutes or equivalents will be accepted.

"<u>Proprietary Items</u>: A particular item may be protected by a patent, pr trade secrets may prevent soliciting alternate sources. Either a patent number or the proprietary nature of the information is required.

<u>Only Supplier Qualified:</u> Used when reliability and maintainability of the system would be degraded unless a specific, prove, and reliable supplier is used.

Spare Items: When replacement parts from alternate suppliers are not interchangeable with original part and repair tools (equipment incompatibility).

<u>Consulting services:</u> Used when the nature of the acquisition is considered to be in the interest of good business management.

<u>Time Limitations</u>: Indicate that product delivery will affect program delivery. It must be verified by specific need dates and program schedules.

Economic Considerations:

- A). Any order less than \$150,000 (if the estimated price is fair and reasonable).
- B). Previously tested product for a similar application that makes it economically unfeasible to test additional products.
- C). Follow-on orders, to the same suppliers, eliminate costs incurred by using a different supplier.
- D). Cost factors, including: standardization costs, engineering costs, maintenance costs, retooling, re-invention costs.

Purchase Requisition N 1). Description of items	umber #:s or service			
2).Supplier	Phone	Es	timated Price	
3).Description of unique	e features of the desired mater	rials or services th	at must meet minimum requirements:	_
4.Description of other it	ems or services that were con	sidered and why t	hey were rejected:	
5.The above requirement	nt is non-competitive for the f	ollowing reason (s	s):	_
