EDUCATIONAL SIGN LANGUAGE INTERPRETERS (ESLI)  
Specialized Service Providers Growth and Performance System (SSP GPS)

Specialized Service Providers (SSPs) at Denver Public Schools (DPS) are vital members of the educational team and have the knowledge and skills necessary to ensure that diverse student populations have equitable access to academic instruction and participation in school-related activities. SSPs are key staff members who play an integral role in successfully supporting the whole child.

OVERVIEW OF THE SSP GPS

The SSP GPS has been designed collaboratively with SSPs of all roles, school and central office leaders, and the Denver Classroom Teachers Association (DCTA). The system sets a clear and consistent level of effective practice to meet our shared goals of Support for the Whole Child and acceleration of achievement for all students.

The following roles, supported by the SSP GPS, directly empower Support for the Whole Child:

- School Counselors
- School Nurses
- School Psychologists and Social Workers
- DHH Itinerants
- Audiologists
- Deaf and Hard of Hearing Itinerants
- Educational Sign Language Interpreters
- Teachers of the Visually Impaired, and Orientation and Mobility Specialists
- Occupational Therapists and Physical Therapists
The SSP GPS provides a framework for our SSPs to identify areas of strength and growth through regular, meaningful feedback sessions with evaluators. The goal of the system is to support SSPs in their professional development towards meeting students’ needs.

The framework is a growth tool that reflects the SSPs’ role. The SSP and evaluator use the framework to gather a preponderance of evidence on the SSPs’ practice throughout the school year during the school or business day. This means that an SSP and evaluator could have evidence to support alignment under Not Meeting, Approaching, Effective or Distinguished for different indicators, but fall within one of these areas for the overall rating.

The SSP GPS provides a holistic and comprehensive view of an SSP’s practice by using the following multiple measures:

- **50% Professional Practice**—measured by the role-specific Professional Practice framework
- **50% Student Outcomes**—measured by Student Learning Objectives

As part of an evaluation using the Professional Practice framework, SSPs should expect to participate in check-in conversations throughout the year (Beginning-of-Year, Mid-Year and End-of-Year), as well as in ongoing meaningful conversations based on observation and/or review of service delivery. The frequency of the latter may vary greatly based on an SSP’s specific role, interaction with students and time in the building. Moreover, the observation and review process must be discussed and agreed upon during Beginning-of-Year conversations.

BEGINNING-OF-YEAR CONVERSATIONS

Beginning-of-Year Conversations are crucial in supporting SSPs throughout the entire year. These discussions set the stage for the supportive relationship between an SSP and his/her evaluator, as well as define expectations for the year to come. This conversation should focus on areas of strength and growth. The overall goal is to support SSPs in their professional development so they can meet the needs of DPS students.
During this conversation, an SSP and his/her evaluator should discuss and agree upon:

- The SSP’s role, ensuring it is focused on areas of greatest potential student impact in relation to the school, caseload and/or time in building, and population served.
- Growth areas of focus for individual professional development.
- The definition of effective performance and what it looks like.
- How observation/data collection will be completed and documented.
- Timing and process for sharing feedback throughout the year in support of an SSP’s ongoing professional growth.
- Student Learning Objectives (SLOs) for the year.

MID-YEAR CONVERSATIONS

Mid-Year Conversations are an opportunity for employees to provide updates on the services being provided to students, and for evaluators to discuss preliminary ratings, feedback on effectiveness and concrete next steps on how to improve performance.

This conversation should include the following:

- Review of feedback on the SSP’s performance using behaviors at the indicator level.
- Identification of any change in focus for an SSP due to environmental factors (e.g., student populations, building, etc.).
- Reflection on strengths, growth areas and next steps for the SSP’s development, and discussion on how the evaluator can support continued growth throughout the year.
- Review of observations and data points collected to date, ensuring that they match the agreed-upon plan, and finalizing the plan for the remainder of the year.
- Review of progress based on SLOs.
END-OF-YEAR CONVERSATIONS

In End-of-Year Conversations, evaluators and SSPs should discuss strengths, progress in growth areas, and data points that validate performance, along with the final overall rating. The conversation should also focus on clear and actionable next steps for professional learning opportunities, and on methods to improve performance in the coming year.

This conversation should include the following:

- Sharing feedback on an SSP’s performance using behaviors at the indicator level (documented and provided to the SSP) and evidence collected throughout the year.
- Sharing ratings assigned at the expectation level based on evidence collected (documented in Infor HR).
- Reviewing SLO outcomes.
- Sharing an overall rating for the year (documented in Infor HR).
- Identifying strengths and growth areas for the SSP’s development and actionable steps for future professional development.

End-of-Year SSP GPS ratings are granted at an expectation and overall level. However, evaluators should provide feedback for growth at an indicator level as this is the most actionable level for the SSP.

For reference throughout the document:

Communication is the exchange of thoughts, messages or information through reading, writing, speaking, listening and/or actions.

Services may include speech-language assessments, case management, special education evaluations/re-evaluation process, special education eligibility, and student accommodation.

Diversity includes race, ethnicity, gender, sexual orientation, socioeconomic status, language, mental and/or physical abilities (students with disabilities, gifted and talented), religion, age, political beliefs, etc. DPS places particular emphasis on the needs of students of color and students with disabilities in order to close achievement gaps for these groups of students.

Resources can be anything that is utilized to assist students in progress toward achievement of individualized student goals and/or mastery of the content-language objective(s), including: academic tools, language supports, media, technology and additional adults in the room. NOTE: Some resources should be available in multiple formats depending on student needs.
